no zina

HIV/AIDS

Awareness, safe sex,
don't share needles,
faithful marriage

TREATMENT

GONORRHOEA

Penicillin
injections

SYPHILIS

Penicillin
injections

HIV/AIDS

No cure, but ART
drugs help live
longer

SIMPLE EXPLANATION

GONORRHOEA

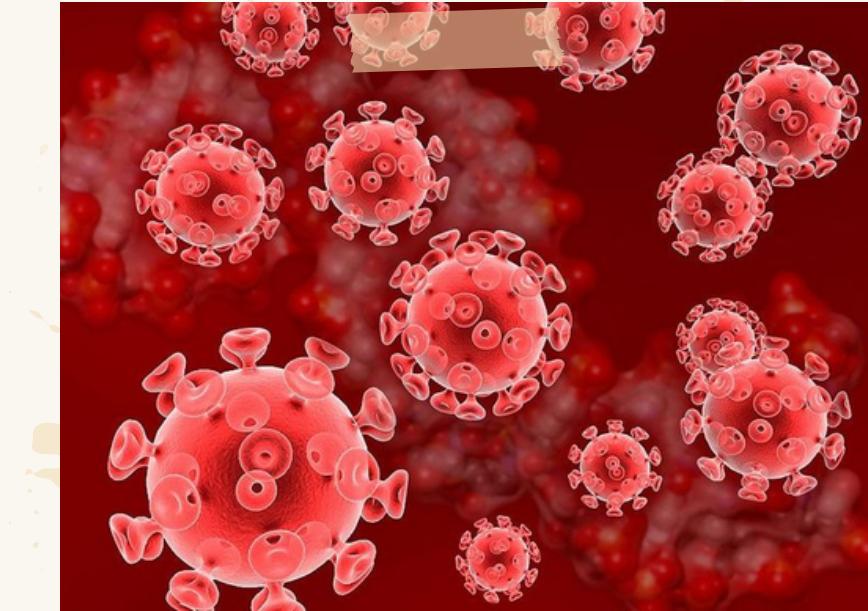

“It is a bacteria that makes it painful to pee and causes pus. If not treated, it can stop people from having babies.”

SYPHILIS

“It starts with a sore, later causes rashes, and if not treated, it can hurt the brain, eyes, and even unborn babies.”

HIV/AIDS

“This virus weakens the body’s soldiers (immune system). The person gets sick easily with many diseases.”

HIV/AIDS – FACTORS THAT SPREAD DISEASE

- Low awareness.
- Denial of disease.
- Lack of information.
- Migration and population mobility.
- Conflict and displacement.
- Poor health care centers.

KEY TAKEAWAYS

- **Gonorrhoea:** Caused by bacteria, affects reproductive tract, can cause sterility, treated with penicillin.
- **Syphilis:** Caused by spirochete, has 3 stages, can damage body severely if untreated.
- **HIV/AIDS:** Caused by virus, destroys immunity, spreads through sex, blood, needles, mother-to-child.
- **Prevention:** Faithfulness, early treatment, avoiding risky behavior, no Zina, safe medical practices.

قال رسول الله ﷺ:
«يَا مَعْشَرَ الْمُهَاجِرِينَ، حِصَالٌ خَمْسٌ إِذَا
ابتُلِيتُم بِهِنَّ - وَأَعُوذُ بِاللَّهِ أَنْ تَدْرِكُوهُنَّ -
لَمْ تَظْهَرِ الْفَاجِشَةُ فِي قَوْمٍ قَطُّ حَتَّى
يُعْلَمُوا بِهَا، إِلَّا فَشَا قِبَلَهُمُ الطَّاعُونُ
وَالْأَوْجَاعُ الَّتِي لَمْ تَكُنْ مَضَتْ فِي
أَسْلَافِهِمْ الَّذِينَ مَضَوْا ...»

A collage of various microorganisms and a person with a mask.

Thank you!
